

ALUMINIUM MASTS * C A U T I O N *

Extending the tube segments:

When extending the segments, you will find that there are two rings engraved into the lower end of each segment. The first engraved ring is only a "warning sign". This is where the red marker lines start. You do not have to stop here. You can pull out the segment up to the second engraved ring. This ring definitely means "STOP". Do not pull beyond this second ring!
