

## Guying the 18m Fiberglass Pole

1 of 4 sets of guy ropes shown  
(cut ropes about 2m longer than shown.)

### GUY LINE LENGTHS FOR SPIDERBEAM 18M FIBERGLASS POLE

#### **BOTTOM GUY LINE:**

Attached to the pole above segment number 4 (height = 6m). We recommend a guying distance from the pole of 7m. This results in a guy line length of approx. 10m.

So you need  $4 \times 10\text{m} = 40\text{m}$  of 2mm Kevlar here.

#### **TOP GUY LINE:**

Attached to the pole above segment number 8 (height = 12m). We recommend a guying distance from the pole of at least 7m. This results in a guy line length of approx. 15m (min.).

So you need  $4 \times 15\text{m} = 60\text{m}$  of 2mm Kevlar here.

**In total**, we recommend to buy the following guy lines:

100m (= 2 rolls of 50m) of 2mm Kevlar
