## Guying the Spiderbeam 12m HD Spiderpole

Attach 4 guy lines to the pole above segment number 7 (height = 7 m ). We recommend a guying distance from the pole of 5 to 6 m . This results in a guy line Length of approx. 11 m . You will need $4 \times 11 \mathrm{~m}=44 \mathrm{~m}$ of 2 mm Kevlar rope. We recommend purchasing one roll ( 50 m ) of Kevlar rope and cutting it into 4 pieces, each 12 m long. NOTE: $1 \mathrm{~m}=3.3 \mathrm{ft}$.

## 18m <br> Guying the 18m Fiberglass Pole <br> 1 of 4 sets of guy ropes shown (ropes lengths shown include about 2m more rope for tying to ground stake.) <br> $$
\text { NOTE: } 1 \mathrm{~m}=3.3 \mathrm{ft} \text {. }
$$ <br> <br> NOTE: $1 \mathrm{~m}=3.3 \mathrm{ft}$.

 <br> <br> NOTE: $1 \mathrm{~m}=3.3 \mathrm{ft}$.}
## BOTTOM GUY LINE:

Attached to the pole above segment number 4 (height $=6 \mathrm{~m}$ ).
We recommend a guying distance from the pole of 7 m . This results in a guy line length of approx. 10 m . So you need $4 \times 10 \mathrm{~m}=40 \mathrm{~m}$ of 2 mm Kevlar here.

## TOP GUY LINE:

Attached to the pole above segment number 8 (height $=12 \mathrm{~m}$ ).
We recommend a guying distance from the pole of at least 7 m . This results in a guy line length of approx. 15 m (min.). So you need $4 \times 15 \mathrm{~m}=60 \mathrm{~m}$ of 2 mm Kevlar here. In total, we recommend to buy the following guy lines:

100 m (= 2 rolls of $50 \mathrm{~m}, 2 \mathrm{~mm}$ Kevlar Rope)

## Guying the Spiderbeam 22 m Fiberglass Telescoping Pole

| $22 \mathrm{~m}^{1} \begin{array}{r} 1 \\ 3 \\ 3 \\ 1 \\ 2 \end{array}$ | 2 Guy Levels, 4 Directions $=140 \mathrm{~m}$ Total Rope <br> - 3 Rolls of $50 \mathrm{~m} / 2 \mathrm{~mm}$ Kevlar Rope |

## 8.5m

6 2 mm Kevlar

Note: for Vertical Antennas with Top-Hat Wires, we recommend using ONLY thin CQ-534 wire for the Top-Hat Wires, and PVDF Monofil Line to extend Them to the ground...

$$
\text { NOTE: 1m = } 3.3 \text { ft. }
$$

2 mm Kevlar
