

# B10-807 DJØIP

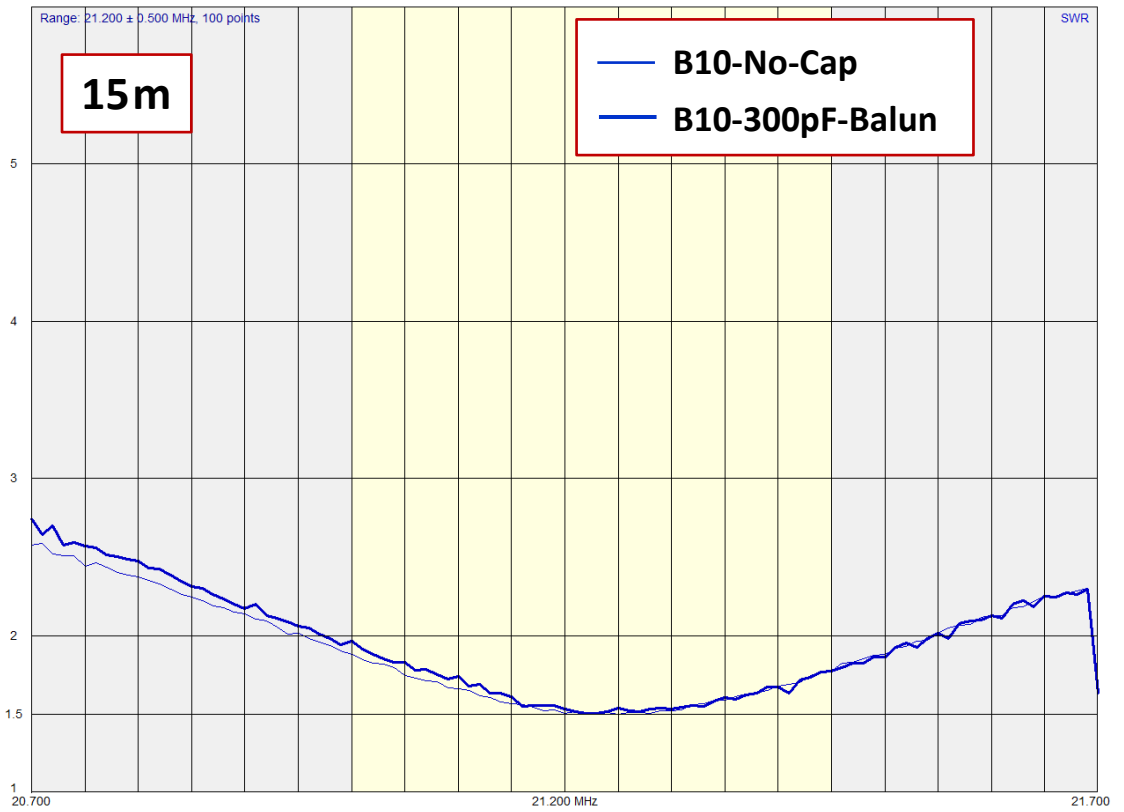

# B10-807 DJØIP

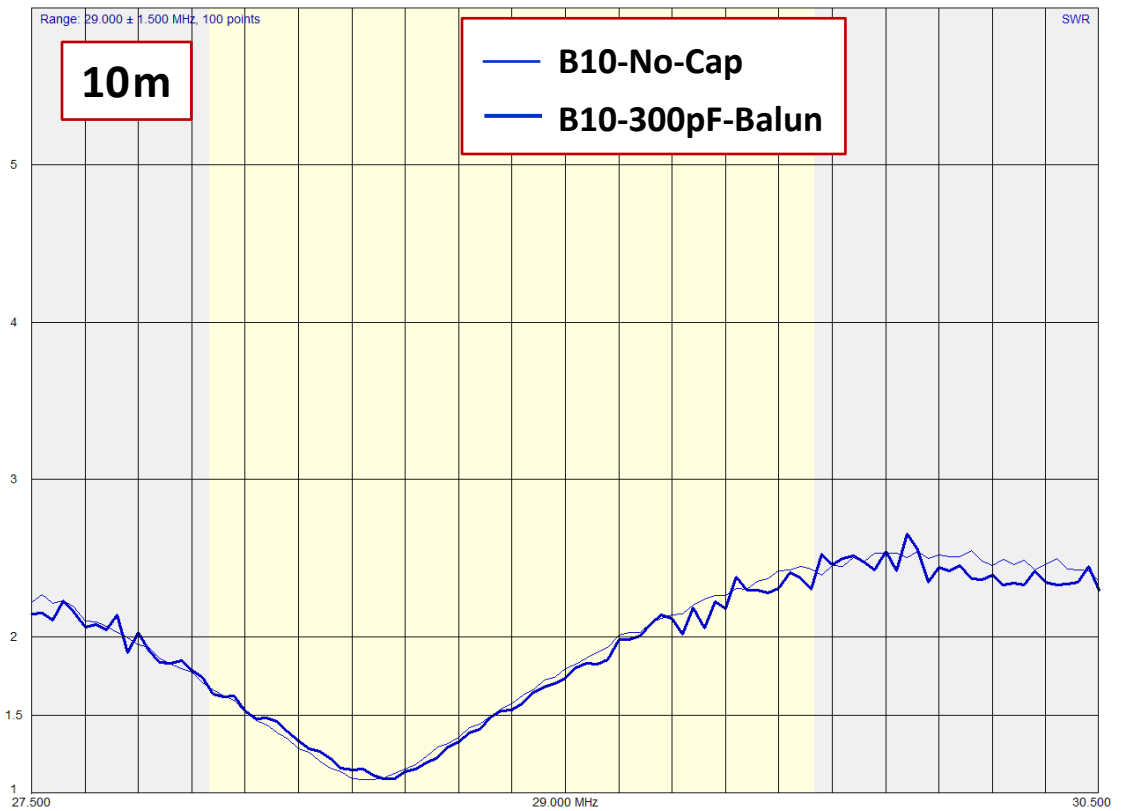

For some reason beginning with 20m, the signal becomes very jagged. The entire group of 300 pF (Balun) tests needs to be repeated with a different 300 pF capacitor.

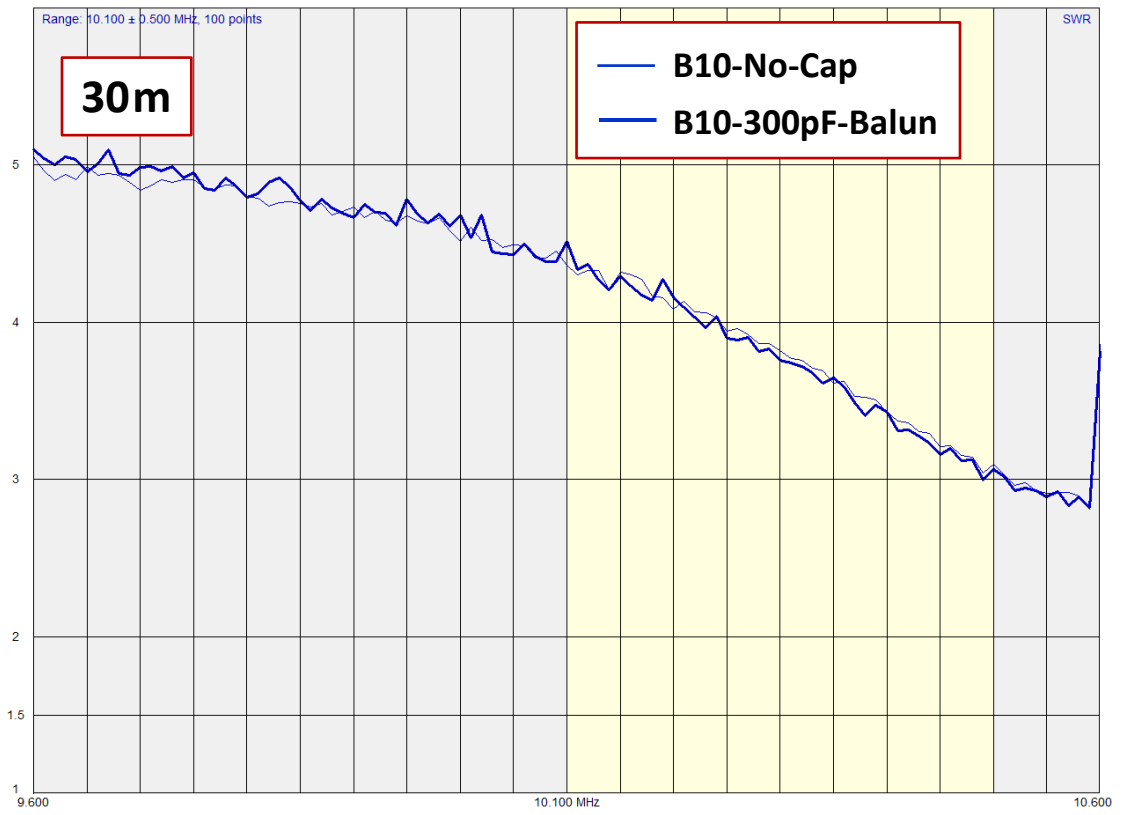

# B10-807 DJ0IP

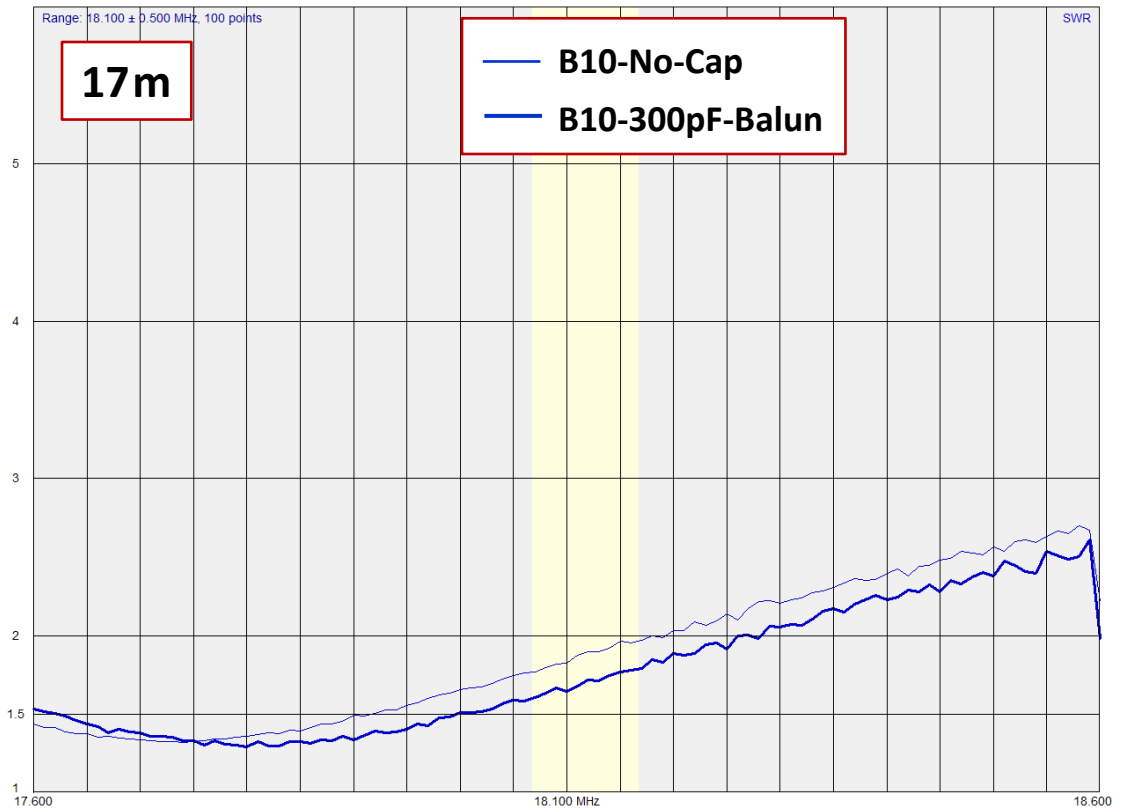

Though 15m looks almost OK, 10m looks awful!

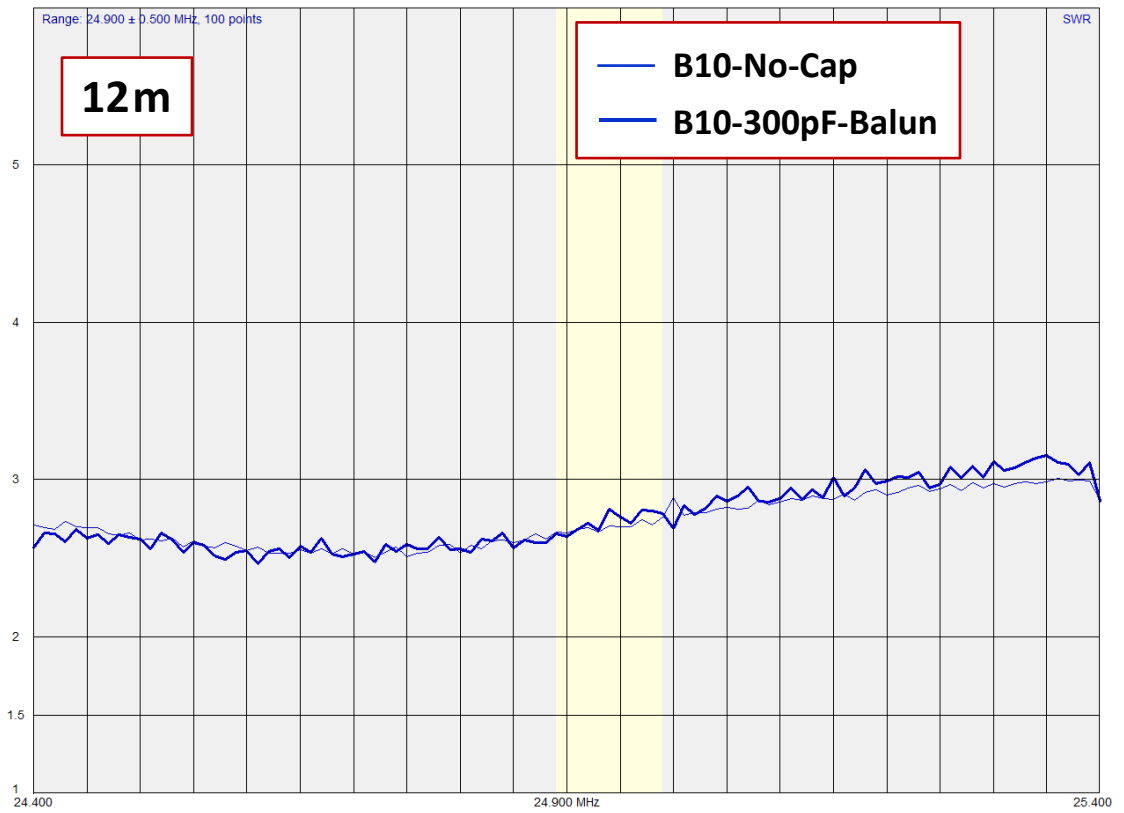

# B10-807 DJ0IP

Here both bands look jagged.

# B10-807 DJ0IP

The jagged curves continued on these bands too.
